

Displays – a secure choice.

DISPLAY SOLUTIONS BY ETRONICS

Five good reasons for displays from etronics.

ENGINEERING-SUPPORT.

We are here to support you with our experience and engineering expertise throughout the development and the entire product life cycle.

COMPREHENSIVE SOLUTION.

Integrated and customized solutions with displays, touch panels, membrane and silicone rubber keyboards as well as entire casings are possible.

QUALITY IS OUR UTMOST PRIORITY.

Not only do we comply with the conventional quality standards and use strict selection and inspection procedures for our partners, we can also carry out validations if necessary.

PRACTICE MAKES PERFECT.

30 years of experience in the design and production of displays, touchscreens and casings make our consulting what it is today.

SMALL-SCALE PRODUCTION POSSIBLE.

Customized small batches are possible with etronics. Reverse engineering is also available.

A host of possibilities under one roof.

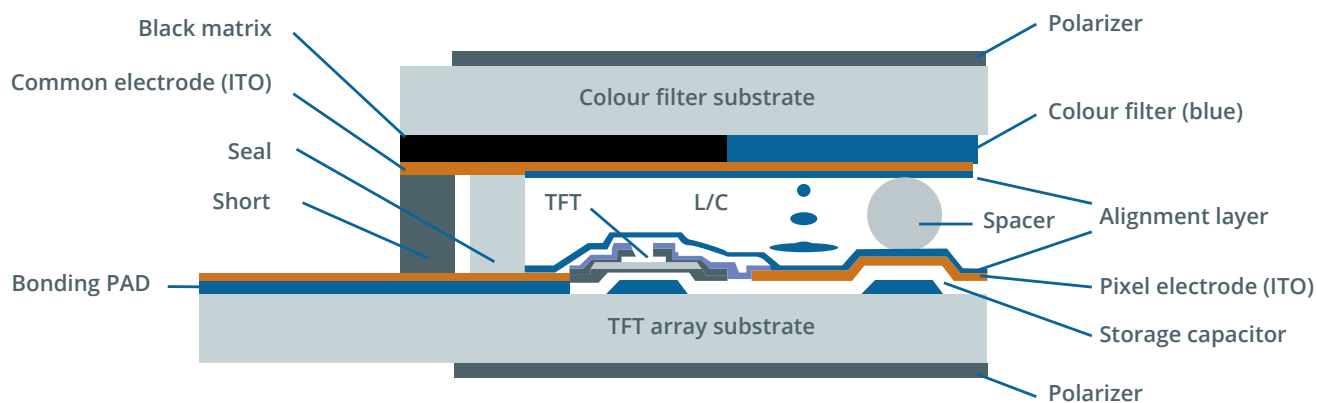

Our spectrum encompasses basic passive segment displays as well as monochrome OLED displays and up to 55 inch colour displays with an integrated controller. In addition, there is our continuous technical support until the project ends.

We provide various technologies to manufacture your customized displays:

- **ASTN** (Automotive STN)
- **FSTN** (Film Compensated STN)
- **STN** (Super Twisted Nematic)
- **CSTN** (Color STN)
- **FFSTN** (Dark FSTN)
- **TFT-Displays** (Thin Film Transistor)
- **DSTN** (Double STN)
- **HTN** (High Twisted Nematic)
- **TN** (Twisted Nematic)
- **EBTN** (Enhanced Brightness TN)
- **IPS** (In Plane Switching TFT)
- **VA** (Vertical Alignment)
- **ETN** (Extended Twisted Nematic)
- **OLED** (Organic Light Emitting Diode)

Customized developments.

Discover an array of possibilities for customized solutions. All conventional display and keyboard technologies are possible and combinable. Just let us know what you would like!

LCD structure

Customized TFT LCD modules

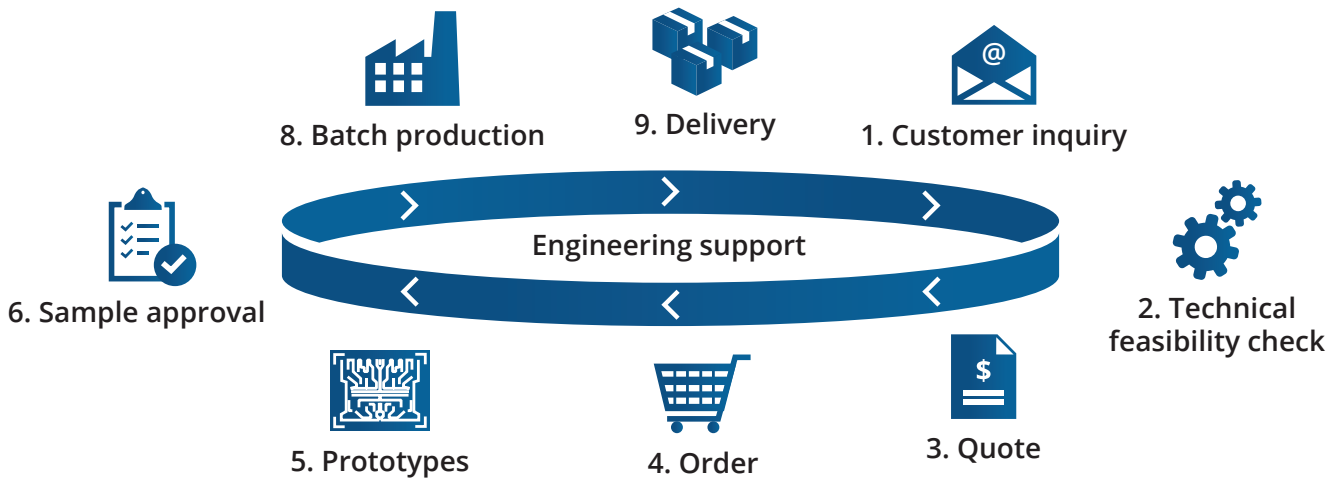

Medical and industrial development projects.

etronics has been supplying not just industrial projects but also medical projects with mostly customized display products for many years. The quality of the end product is a reflection of these years of experience.

Cooperation is the way to go. Especially with us.

We consult, conceptualise, design, develop and produce for you in the entire course of the project.

A NEAT CONCEPT: PROFESSIONAL PROCESSING.

Comprehensive service. For comprehensive satisfaction.

We joined the LCD display market 30 years ago. Over time we gained a lot of knowledge and experience so that we have now been accompanying customized developments for years. Be it a passive segment display, a TFT or an OLED display, we can support you reliably in the design, development and production. We ensure in particular that the production remains available for a long time.

We look forward to developing a display with you.
